Product description

Zettex Security Cleaner is an adhesive cleaner which does not leave any track or residue behind. Zettex Security Cleaner can be used safely on the most common surfaces. Besides, Zettex Security Cleaner is a versatile cleaner and degreaser. It can be used on the most plastics; painted- and lacquered surfaces; vinyl and glass.

Material

Aliphatic hydrocarbons

Properties

- Very safe
- Universal applicable
- Ready to use
- Human and environmentally friendly
- Slowly evaporating

Application

Zettex Security Cleaner does not evaporate quickly, therefore there is no possibility to inhale harmful solvents. Due to the slow evaporation; Zettex Security Cleaner will move in the surface for a longer time; therefore, the surface will be cleaned thoroughly. In most cases over spraying is not necessary. Zettex Security Cleaner does not attract any strings. In addition, Zettex Security Cleaner is a professional cleaner for the use in construction and industry and it can be used as a pretreatment tool for lacquer-, painting-, adhesive- and lubrication works. Last but not least Zettex Security Cleaner can also be used as a finisher for Zettex Polymer Sealants and it is very suitable for cleaning all of your tools.

Safety recommendation

Make sure you read our MSDS before using this product.

Properties	Specification
Base	Aliphatic hydrocarbons
Density (g/ml)	0,803
Flashpoint (°C)	<0
Consistency	Liquid
Solvents	Hydrocarbons
Odour	NO
Colour	Colourless
Spray pattern	Jet
Application temperature	5°C - 40°C
Evaporation speed	Slow
Packaging	500 ml, 1 ltr, 5 ltr, 25 ltr
Storage	Cool and dry
Shelf life	24 months

Water soluble

NO
